0.1 Prerequisites

Second-year standing in the MA program in Linguistic Theory & Typology; LIN 601 Research Methods

0.2 Course description

This course is designed to train students in research and professionalization related to the discipline of linguistics, and so prepare them for active engagement in professional activities in linguistics. To that end, students will create a 20-30 page research report as a culmination of a set of training milestones that include (1) producing an annotated bibliography, (2) writing an abstract, (3) reflecting on good practice in linguistics research, and (4) publicly presenting research. An integral component of the course are the periodic collaborative sessions where students discuss with their peers and faculty their progress in theory, methodology, data collection, and data analysis for their research reports, and where they engage in peer review of their developing portfolio of professional materials.

0.3 Student learning outcomes:

Upon completion of this course, students will be able to:

- perform independent theoretical research on an original topic with results that are professionally presentable;
- demonstrate the application of established research methods to a field of inquiry;
- engage in informed scholarly discussion and debate with colleagues on linguistic topics both within and outside their direct fields of specialization;
- demonstrate an awareness of career opportunities for linguistics graduates, and identify strategies for securing a professional position.

0.4 Required materials

Readings specific to the student's field of study will be the primary reference material. Students will also be required to take part in general class readings of classic linguistic papers as well as papers published by faculty. All materials will be made available on Canvas.

0.5 Course work

Students in this course will produce a 15-30 page research piece that should serve as the basis for their thesis literature review. Milestones toward this goal will be a subset of the following deliverables:

- a statement of purpose of the research project, including a detailed abstract summarizing the theoretical and methodological approaches to be undertaken in the project and the material to be analyzed;
- a working bibliography appropriate to the project;
- a summary of previous and current work in the field (literature review);
- oral presentation of the research

0.6 Course Evaluation

Table 1: Contributions to final grade

Deliverable	Value
Research statement and abstract	10%
Literature review draft	10%
Bibliography	10%
Oral presentation	10%
Methods draft	10%
Final draft lit review	50%

0.7 Grading Scale

Table 2: Official grading policy

letter grade	percentage
A	90 - 100%
B	80 - 89%
C	70-79%
E	69% and below
